(54) Title: FLEXIBLE TRI-FOLD GARMENT BAG

(57) Abstract: A flexible tri-fold garment bag has an elongate integral body with a front and rear flexible panel and a peripheral side flexible panels connected to the front and rear flexible panel along the mutual peripheral edges thereof. A top flexible strap handle is connected at the top of the bag to the rear panel, and a mid flexible strap handle is connected to the rear panel at the upper end of a lower one-third of the bag body. The top handle is longer the mid handle so that the thickness of the bag body when filled with garments can be accommodated.
